

## RD Certificate Number: EWS807F

### Spacetherm A2 Wallboard with Spacetherm Slentex A2 Insulation

#### Description

This is an assessment of Proctor Spacetherm A2 Wallboard which is a high performance thermal laminate which is specifically designed to be fixed to a wall or a ceiling with timber battens or metal studs.

It consists of Spacetherm Slentex A2, a fire resistant Spacetherm Aerogel insulation blanket bonded to plasterboard. It is ideal for use in applications where low U-values are required but space is at a premium as it has a thermal conductivity of 0.019 W/mK. The insulation blanket combines a silica aerogel with a glass fibre matrix, the material is breathable and therefore it is also possible to directly fix the laminates to certain existing wall substrates; however, please check with A. Proctor Group Ltd.

#### Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the scope of this registration.

#### Validity

This system has been checked for compliance in accordance with English, Welsh and Scottish Building Regulations

Registration was first issued on 09/04/19 and is valid until 31/03/22 providing there are no amendments to applicable regulations.

**Issue dated** 09/04/2019
